Misleading Invoices
Misleading Invoices: Definition

- Fake or misleading documents: unsolicited communications received by users of the Madrid System

- Holders, representatives and IP Offices report on communications received from service providers of various sources and origins

- Documents invite payment of fees for services confusingly similar to those provided by WIPO

- Generated by entities monitoring publicly-available registration details and contact information (WIPO Gazette, ROMARIN, etc.).
Misleading Invoices: Current Situation

- Number of fraudulent or misleading invoices increasing
- At national, regional and international levels (CTM and Madrid System)
- Renewals of international registration of trademarks, filings, publication and registration
- Anti-Fraud Network, established by OHIM
Misleading Invoices: Actions Taken

Activities:

- Information notice **No. 6/2010**, Madrid Highlights **No. 3 September 2014**, warning on certificate of international registration

- Web page – warning, reference list (PDF: name, date, origin), IP Office links
Warning - Requests for Payment of Fees

It has come to the attention of the International Bureau that what appear to be private business establishments are sending letters to the holders of international registrations, inviting them to pay fees for publishing their marks in publications which appear to be of an official nature, recording them in business directories or similar activities. Some of these establishments use signs similar to the WIPO logo or name, thereby misleading the public as to their source.

The International Bureau advises users that such activities have no legal effect under the Madrid system. All international trademark registrations and related recordals are published in the "WIPO Gazette of International Marks", the only official publication of the Madrid system. All fees payable under the Madrid system are to be paid to the International Bureau directly in Swiss Francs or through the Office of Origin. The WIPO "ROMARIN" international trademark information database contains information regarding international applications, international registrations and subsequent designations. It can be searched free of charge.

If you have any questions about a letter that you have received, please check with your representative or contact us.
